# Web sockets

•••

Nicolas Chagas Souza - 200042327

# Overview

# Socket

Um socket fornece um meio de comunicação entre dois processos.

# Tipos de Socket

Existem dois tipos principais de sockets:

- Unix domain sockets
- Internet domain sockets

# WebSocket

O protocolo WebSocket permite uma comunicação bidirecional e full-duplex entre um cliente e um servidor.

### WebSockets vs HTTP

#### WebSockets:

Troca rápida e/ou contínua de dados

#### WebSocket Connection

#### **HTTP Connection**

# Prática

#### Objetivo:

- Identificar a diferença de desempenho na utilização do protocolo WebSocket, em relação ao HTTP.

#### Comando:

- bin/bash files/start 1000 5000 10000 200000 -1

Qtde de Pings	Duração WS (s)	Duração HTTP (s)	Diferença (HTTP - WS) (s)
1000	0.306087	1.741102	1.435015
5000	1.171461	9.116139	7.944678
10000	2.365744	16.312522	13.946778
200000	58.237461	361.398553	303.161092
